This scatter plot illustrates the relationship between the number of shots a team concedes per match (x-axis) and the expected goals per shot (y-axis) for 30 Bundesliga teams. The x-axis, 'Shots Against per match', ranges from 6 to 17. The y-axis, 'xGA per Shot', ranges from 0.07 to 0.14. A dashed vertical line is drawn at 13 shots against per match, and a dashed horizontal line is at 0.112 xGA per shot. Teams are color-coded by their league position: 1st-6th (dark green), 7th-12th (blue), 13th-18th (red), 19th-24th (yellow), and 25th-30th (grey). The plot shows a general negative correlation, with teams conceding more shots often having a higher xGA per shot, though there are notable outliers like Bayern Munich and Borussia Dortmund.

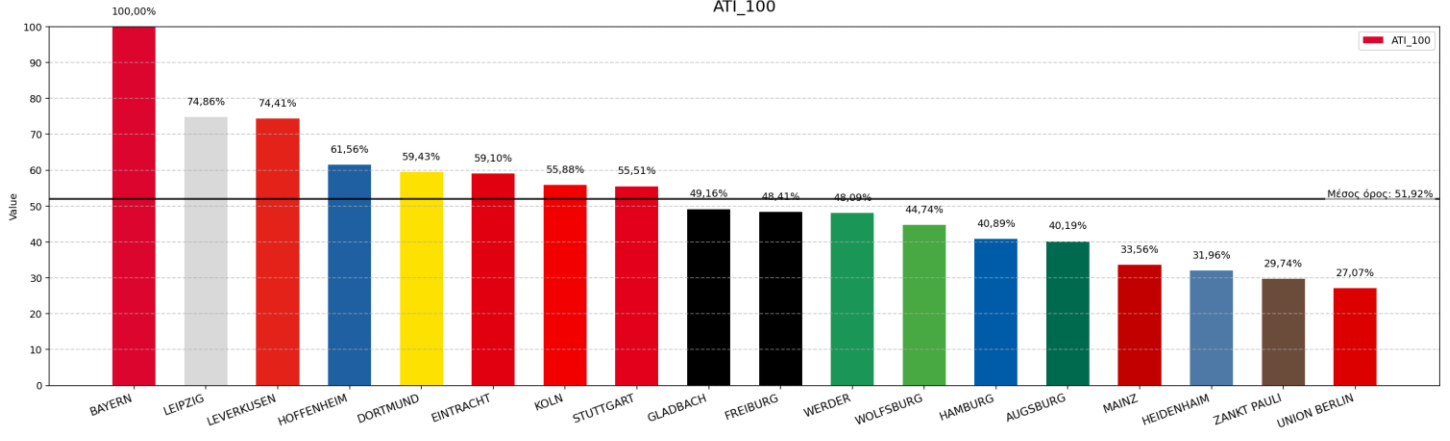

Team	Shots Against per match	xGA per Shot
Bayern	9.2	0.073
Dortmund	10.5	0.096
Eintracht Frankfurt	11.3	0.124
